## SKILLS

---

<i>Languages</i>	JavaScript, SQL, Python
<i>Technologies</i>	PostgreSQL, Node.js, React, Express.js, Git, Docker
<i>Other</i>	Data Structure, API Integration, Database Management

## EXPERIENCE

---

### Logistics Data Coordinator

Feb 2018 - Nov 2024

*Sunworld*

- Improved transaction accuracy by 20% and reduced processing time by 15% through efficient data entry and report creation, leading to smoother daily operations
- Managed customer and supplier transactions, created detailed reports based on database data, and ensured all information was accurately recorded in the system.

### Quality Assurance

Jan 2017 - Dec 2017

*Alphatech*

- Enhanced product consistency by identifying defects during hourly inspections and ensuring precise data input, improving overall quality control.
- Monitored product specifications, recorded inspection results, and maintained accurate system logs

## PROJECTS

---

### Smart Brain

<https://smart-brain-cgkw.onrender.com/>

Built with React for the front end, Node.js and Express for the back end, and PostgreSQL for database management. It integrates the Clarifai API for face detection

### Robofriends

<https://jimwellgersalia.github.io/robofriends/>

Built with React, and uses the RoboHash API to display robot avatars based on user interactions.

## EDUCATION

---

### BS Information Technology

2016

*Bulacan State University, Malolos Bulacan*
